

# CONTROL OF LEVELS IN FUEL TANKS

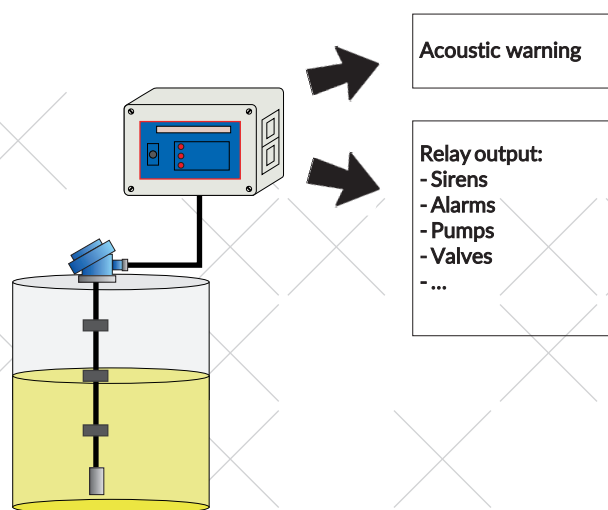

Electrical panels for the control of levels in diesel tanks. This solution allows you to observe with pilots of signaling the level of diesel and controlling different outputs (pumps, electrovalves, alarms, messages, sirens, etc).

## R23G

Diesel tanks.  
Light indicator.  
Equipped with special sensor.  
Monitoring and control of diesel levels.  
Relay type output for active alarms, pumps, etc

## Applications and Features

3 Level Sensor

Diesel tanks.  
Recovery of hydrocarbons.  
Light indicators.  
Equipped with a special sensor of 3 levels.  
Relay type alarm output.  
Acoustic warning.  
Minimum level alert and maximum level.
