

ELECTRONIC PANELS FOR WELLS WITHOUT PROBES

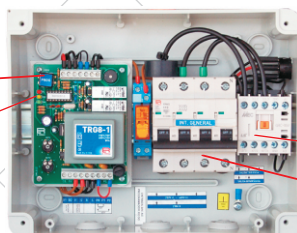

R27E

Protection and control of overload and absence of water for all type of pumps (230V II, 230V III and 400V III) up to 18A in one box without level probes

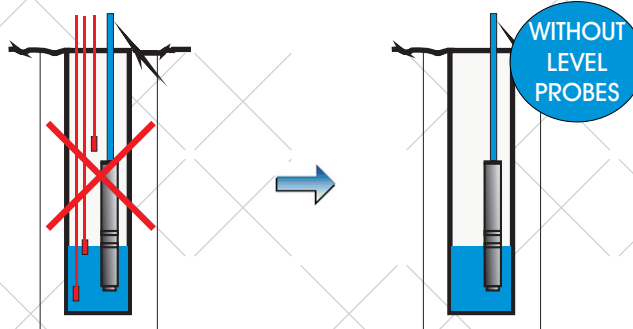

- For pumps 230V single-phase up to 3HP.
- For pumps 230V three-phase up to 4HP.
- For pumps 400V three-phase up to 7,5HP.

Programming from a single push button
Alarm light indicator
Low level light indicator
Start light indicator

Man-Stop-Automatic
Contactor
MCCB protection

- Mounted in IP65 box.
- General input with MCCB protection.
- Output connection with contactor.
- Programmable overload protection.
- Programmable low level water protection without level probes.
- Easy installation and programming. Automatic programming.
- Reduction of costs in the installation.
- Auxiliary input for switch pressure, level switch, programmer, etc.
- Control with manual-stop-automatic selector.
- Programmable automatic reset in case of low level water.
- Protection against blockage of the pump during periods of long rest.
- Contact for other options. Possibility of programming and custom assemblies.
