

RF WIRELESS FLOAT LEVEL SWITCH

Electronic equipment for **automatic filling** in tanks and swimming pools through float-type level switches wireless mode. Includes **RF transmitter** with float type level switch and **RF receiver** on DIN format with relay type output with contact for control circuits. When the level switch detects low level sends a signal to the receiver to enable the control circuit. It does not need programming since the equipment is sold programmed to work in pairs with its sender and its receiver. A single emitter can activate more than one receiver at the same time for automatic control in special projects for the automatic filling RF wireless mode.

RBE1

FLOAT LEVEL SWITCH EMITTER

Emitter electronic equipment equipped with **float level switch**. Without need for wiring between the float switch and the control panel. Safety low voltage. Includes emitter, level switch and transmitter battery.

RBR1

CONTROL RECEIVER

Receiver electronic equipment for control by RF wireless float level switches. Includes indicator lights. **Input:** Level switch via radio. **Output:** 1 relay switched contact. Programming included. Contact for control circuit.
