

ELECTRONIC PANEL AGAINST FREEZING

Frost protection in times of cold in the pool.
Equipped with digital thermostat with display and probe.

Thanks to its digital display control panel and electronic thermostat it activates automatically the pool filter pump in this way the water does not freeze.

The automatically adjustable outer probe will deactivate the filter pump when the set temperature is reached.

- Digital temperature indicator.
- Security system was simple and very efficient.
- Fits in a new or existing installation.
- Simple installation and use.
- Programmable electronic thermostat.

RAH01

Electronic panel
against freezing.
